

ENERCHINA

*The 6th China (Beijing) International
Energy Saving and Environmental Protection Exhibition*

June 10 – 13, 2012

Beijing Exhibition
Center
Beijing, China

www.enercn.com

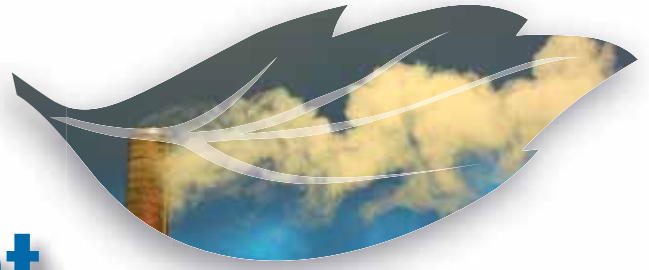

Hosts:

Beijing Municipal People's Government
China National Development and Reform Commission (NDRC)

Organizers:

Beijing Energy Conservation and Environmental Protection Center
E.J. Krause & Associates, Inc.

Growth by Innovation and Green Development

Since 2005, ENERCHINA has become the leading exhibition in China for the energy-saving, renewable energy, clean energy and environmental technologies, products and services with the unique support from China National Development and Reform Commission (NDRC). In each of its edition, it attracts around 300 exhibitors to demonstrate their latest products, technology and services to over 13,000 professional visitors who are the representatives of this trillion dollars market in China. According to the official of NDRC, the cumulative value of the energy conservation industry was 1 trillion Yuan as of the end of 2010, and it is forecasted to grow at least 15 percent annually during the 12th Five-Year Plan (2011-2015) period. China will still pay the most attention to reducing energy consumption in industrial production and will focus on the application of the green economy concept in industry, agriculture, services and green consumption.

Run in conjunction with the National Energy Conservation Publicity Week, ENERCHINA 2012 will attach the great significance with the development of Chinese energy-saving and environment protection industry and provide one of the best platforms for the international companies to seek their business opportunities in this vast and fast growing market.

Exhibitor profile:

- Energy conservation and environment protection administrations
- Communities and industrial enterprises that are under energy-saving renovations
- Design institutes, research and scientific institutes
- Project developers and contractors
- Investment, financial institutions and consultants
- Associations and societies
- Agents, distributors, importers and exporters
- Colleges and universities
- Environmentalists

Visitor profile:

- Government administration 9.71%
- Research Institute 6.85%
- Institution 13.81%
- Enterprise 51.22%
- College 4.77%
- Association 3.45%
- Other 10.19%

- 18,000 Square Meter Exhibit Space
- 300+ Exhibitors
- 15,000 Professional Visitors
- 70+ Supporting Media
- In Conjunction with National Energy Conservation Publicity Week

Business and solutions are what
ENERCHINA brings to you

Two high-level forums
Two B2B matchmaking events
One technological forum
Three governmental policy releasing conferences
Seven exhibitor's seminars

There is no better event to be in contact with the biggest quantity and quality of clients and prospects.

June 10-13, 2012

Beijing Exhibition Center, Beijing, China

ENERCHINA is divided into 4 pavilions which create a great sustainability event.

Circular (recycling) Economy Pavilion

Cleaner production technology; building roof plantation; eco-city concept and model; recycling and utilization of waste tires, plastics, paper, glass, electronic devices, building waste; and etc.

Clean and Renewable Energy Pavilion

Solar energy, wind energy, bio-energy applications for power and heat supply; rural area energy solutions; new energy cars; geothermal technology and applications; urban garbage power plant; and etc.

Water-Saving Pavilion

All water-saving devices and applications used in agricultural and industrial use as well as in daily life; water recycling and reuse; rain water collection; sewage treatment equipment and technology; low-water consuming plantation; and etc.

Energy-Saving Pavilion

Industrial Energy Conservation and Emission Reduction:

applications of waste heat and excess pressure; recycling of waste steam; recycle and reuse industrial waste and its treatment; condensation water collection; energy-saving boilers; energy storage systems; high efficiency consumer goods; etc.

Green Building: energy-saving wall, window, and building materials; energy-saving illumination device and technology; intelligent control system for buildings; low-energy consumption for heat supply and air-conditioning; energy consumption monitoring system; and etc.

2010 Exhibitor Breakdown by Industry

Industrial Energy Saving

Building Energy Saving

New Energy

Energy Conservation Service

Traffic Energy Saving

Environment Protection

Refuse Treatment

VIP Attendees
